PROFESSIONAL SUMMARY

Aspiring Data Scientist with expertise in machine learning, statistical analysis, and data visualization. Proficient in Python, SQL, and frameworks like Scikit-learn. Experience in building predictive models, deploying Flask APIs, and delivering data-driven solutions. Passionate about solving complex problems using advanced analytics and machine learning techniques.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++

Machine Learning: Scikit-learn, Numpy, Pandas

Data Visualization: Tableau, Power BI, MS Excel, Matplotlib, Seaborn

Databases: MongoDB, MySQL

Other Skills: MS Excel, Statistical Analysis, Problem-solving, Communication, Team Collaboration

EDUCATION

Government College of Engineering, Amravati **2021 – 2025**
B.Tech - Computer Science And Engineering - CGPA:7.38 *Amravati, India*

Swami Ramdas high school, Girnera **2018 – 2019**
HSC -Science - Percentage : 74.62% *Sambhaji Nagar, India*

COURSEWORK / SKILLS

- | | | | |
|--------------------------------|---------------------|--------------------|---------------------------|
| • Data Structures & Algorithms | • Operating Systems | • OOPS | • Computer network |
| | • DBMS | • Machine Learning | • Artificial Intelligence |

INTERNSHIP

Trainity  **Aug 2024 – Oct 2024**
Data Analytics

- Performed data cleaning, EDA, and statistical analysis to extract insights.
- Created dashboards and visualizations using tools like Tableau and Power BI.
- Utilized SQL and Python for data manipulation and analysis.
- Delivered actionable insights and reports to support decision-making.

PROJECTS

Diamond Price Prediction Using ML  | Python, Scikit-learn, Flask, EDA, Pipeline **2024**

- Developed a machine learning model, achieving 0.95%+ accuracy, predict diamond prices using key attributes.
- Designed an end-to-end data pipeline, including preprocessing, model training, evaluation, and visualization.
- Deployed a Flask API for real-time prediction, enabling seamless integration with user-facing applications.

Impact of Car Features  | Excel, Python, Power BI **2024**

- Analyzed car features data to identify factors impacting performance and customer preferences.
- Utilized Excel, Tableau, and Python for data cleaning, visualization, and insights generation.
- Provided actionable insights to guide product development and marketing strategies.

Diabetes Patient Classification | ML,  | Python, Scikit-learn, Flask, EDA **2025**

- Built a classification model using Logistic Regression, Random Forest, and XGBoost using GridSearchCV, achieving 85%+ accuracy.
- Identified key risk factors like glucose, BMI and visualized insights with Matplotlib and Seaborn.
- Deployed the model as a Flask API for real-time predictions.

CERTIFICATIONS

• **Data Science Master By PW**

Skills Learn: Python, Numpy, Pandas, Matplotlib, Seaborn, Statistics, Machine Learning, scikit-learn, Deep Learning, TensorFlow, Tableau, Power BI

• **Data Analyst - Trainity**

Skills Learn: Python, Numpy, Pandas, Matplotlib, Seaborn, Statistics, Excel, Tableau, Power BI
